I read where you are considering closing the city pool? I hope that you don't do this! The pool is under utilized and the city is missing out on a real community gem. not only does the high school swim team use the pool for practice.....why can't the city reach out to P.A.L or another organization to start a youth swim team to get some of the younger kids into the sport.....I'm sure you could find a coach or two who would volunteer their services....why not do aqua-aerobics for the older set? again maybe a volunteer could be enlisted for the instruction.....another thing, how about a small splash park? it may cost a little money, but could be a money maker for the city....that way our toddlers wont have to travel all the way to Tavares to cool off ! If you , as a city get it together the pool could actually a center piece for our wonderful area.....Please don't let us down !
